PROFILE

Engineering leader with 10+ years of experience architecting scalable systems, driving technical strategy, and mentoring high-performing teams. Expert in modern frontend ecosystems (React, Next.js, TypeScript) and backend infrastructure (Node.js, Rust, AWS). Adept at translating business goals into robust technical roadmaps, fostering engineering excellence, and delivering user-centric products at scale.

EXPERIENCE

Senior Frontend Engineer | CEEZER, Berlin — June 2024 – Present

- Defined technical strategy for frontend architecture, enabling the platform to handle 2x traffic without performance degradation.
- Established a company-wide UI Kit & design system (TypeScript + Storybook), increasing developer velocity by 40% and ensuring accessibility compliance.
- Drove alignment across product and engineering teams, resulting in 3 major feature launches that strengthened CEEZER's market leadership.
- Improved development processes by optimizing epic workflows, reducing bug counts by 80%, halving testing durations, and increasing delivery speed.
- Enhanced engineering quality by introducing AI-friendly developer guides and rigorous testing practices, leading to 60% fewer post-merge issues.

Senior Frontend Engineer | Grover, Berlin — Aug 2020 – Jan 2024

- Owned architecture and delivery of the Grover Card application, collaborating directly with banking partners and stakeholders.
- Delivered Grover Cash, a subscription management feature, driving a 22% increase in second subscriptions and onboarding 10,000+ new users.
- Influenced product strategy by translating business requirements into scalable technical solutions, ensuring alignment across engineering, design, and compliance.
- Mentored junior engineers and facilitated knowledge sharing to maintain high development standards.

Senior Frontend Engineer | Migros, Istanbul — Jul 2018 – Mar 2020

- Led modernization of migros.com.tr, replacing unstable legacy systems and delivering a restructured e-commerce platform in under 45 days.
- Designed and deployed a full-featured PWA (Angular 7+) for tazedirekt.com in 6 months, boosting engagement by 50% and reducing development time for new features 3x.

- Established frontend best practices and documentation, enabling long-term scalability.
- Built and delivered a frontend training program for junior developers, ensuring continuity and technical growth of the engineering team after transition.

EDUCATION

Yildiz Technical University — Mathematical Engineering, 2007-2012

CORE SKILLS

Leadership & Strategy

Technical Leadership, Architecture Design, Mentorship & Coaching, Stakeholder Communication, Roadmap Planning

Frontend Expertise

TypeScript, React, Next.js, Angular, Progressive Web Apps, UI/UX Engineering, Performance Optimization

Backend & Infrastructure

Node.js, NestJS, Rust (WebAssembly & Systems Programming), Redis, AWS (Lambda, ECS, S3)

Testing & DevOps

Automated Testing (Jest, Cypress), CI/CD (GitHub Actions, GitLab CI, Jenkins)
